SIMPLE. SAFE. LIVING.

SMART INNOVATIONS.

NEWS & TRENDS

HE IS A LIFE PROTECTOR AND, IN MANY CASES, A LIFE SAVER. FOR 35 YEARS, INNOVATION AND THE HIGHEST QUALITY HAVE BEEN HIS PERSONAL DEMANDS FOR HIS PRODUCTS. SAVING THE LIVES OF PEOPLE IN CHALLENGING PROFESSIONS IS HIS ULTIMATE GOAL. WHEN ANTON PFANNER FROM HOHENEMS BEGAN DESIGNING SPECIALIZED PROTECTIVE CLOTHING FOR FORESTRY, INDUSTRY, HUNTING AND OUTDOOR ACTIVITIES 35 YEARS AGO, HE COULD NOT HAVE IMAGINED HIS PATH TO SUCCESS.

Heinz Wendel in conversation with Anton Pfanner. The company's founder and CEO tells us more about the company's history, its successful concept, and the challenges it has overcome over the past 35 years.

A DOER WITHOUT FEAR OR BLAME?

The headline already says a lot. Anton Pfanner pursues the goals he sets with meticulous care and deep technical know-how, for which he receives the highest praise from all areas involved. I was amazed when I visited this model company. Nothing – absolutely nothing – is left to chance, and the boss is happy to share his ideas and working methods.

How did the company come to be founded?

Through personal experience and insights from acquaintances, the idea was born to develop products for the most life-threatening jobs – products that make work easier in extreme terrain and, above all, protect against severe injuries and fatalities. In a world characterised by constant change and new challenges, we have set clear principles for ourselves in order to remain at the forefront and meet the highest standards. As professionals – just like our customers – the company focuses on simplicity and efficiency, maximum safety and maximum comfort! Our declared goal is to be number one. We are our own toughest critics and place only the highest demands on our products. It is – and remains – our constant mission to provide our customers with maximum support and protection in their daily work. We are inspired by the demands placed on our products all over the world. Whether it's wet and cold or dry and hot – PFANNER® protective clothing adapts to changing conditions across the globe.

If you take a look around the company, the focus on sustainability is clearly noticeable. PFANNER® doesn't seem to follow fleeting trends!

I am personally very proud of this. Some PFANNER® protective clothing products have been part of our range since 1990. Our excellent team is convinced of the long-term quality and benefits of our products. Top quality and durability are our top priorities. Most of the production takes place at locations here in Europe. Great importance is attached to maintaining a transparent supply chain with short transport routes and fair working conditions at all production sites. PFANNER® protective clothing is also making great strides towards a better environmental footprint: our warehouse has been converted to solar energy, and a large part of the fleet in Vorarlberg is electric. All our packaging is recyclable, and all our catalogues are printed climate-neutrally.

PROTOS® – the safest head protection in the world – seems to be a real feat.

PROTOS® is the result of years of research and development. It is based on several innovative technologies: we use high-performance materials that are ultra-lightweight and incorporate highly resistant composites that absorb impact energy and provide penetration protection. PROTOS® features a special multi-layer construction that optimally distributes energy upon impact, minimising the risk of head injuries. A precise fit, adjustable straps, and breathable functional fabrics ensure a high level of comfort during wear, which increases user acceptance. Some versions of PROTOS® are equipped with Koroyd, which absorbs impact forces up to five times more effectively.

Industry experts praise you as a pioneer whose work has sustainably transformed the safety culture in the areas mentioned. Innovation awards keep piling up. What lies ahead in the near future?

We want to continue on our path as successfully as before, following the motto "Stick to what you know best." With ongoing projects and exciting new developments – which we will not be able to present until our anniversary – there are still many challenges ahead. We will continue to expand our product range, offering protection from the sole of the shoe to the top of the head. And, of course, we want to celebrate our 35th anniversary in style. Our exceptional team has more than earned it. As founder, idea generator, developer, safety enthusiast and, above all, as the boss, I am really proud of every single employee. Oh yes, I also have a sustainable hobby: I care for my beautiful mouflons in nature every day, which give me many moments of happiness.

The phone is ringing constantly, Anton Pfanner has all the strings in his hands and acts in a friendly, straightforward, and always well-informed manner.

A flagship company from the small state of Vorarlberg, based in Herrschaftswiesen, Koblach, has made a very positive impression worldwide.

Congratulations!

IT IS ALL ABOUT
THE SHOE.

Extra-strong eyelets

Active-grip
all-terrain Vibram sole

NEW

Bernina Safety

- Safety shoe EN ISO 20345 S3
- Perwanger leather
- 100 % waterproof membrane
- Precise fit, stable and reliable
- Waterproof and breathable
- Self-cleaning active-grip all-terrain Vibram sole
- Lightweight textile puncture-proof sole
- Extra-strong eyelets

Material:

Upper: Leather, Cordura
Lining: PES
Sole: Vibram

Sizes:

38–46, LS: 47–48
Lagre sizes: + 10 % surcharge

The Bernina Safety safety shoe was specially developed for work in alpine terrain. With its protective toe cap and puncture-proof textile sole, the Bernina Safety offers optimal all-round protection.

The special rubber compound of the Vibram mountain profile sole ensures a perfect grip – whether on a wet grassy slope or solid ground. Thanks to the membrane, this multifunctional mountain shoe is both waterproof and breathable.

BOA® Class 2 Chainsaw Protection Boot

- Perfect fit due to double BOA® Fit System
- The lightest class 2 chainsaw boot, less than 1 kg at EU shoe size 41
- Rubble protection, upper material and chainsaw protection continuously riveted together
- Metal-free toe cap and sole
- EN ISO 20345 S3 and EN ISO 17249 certified
- Waterproof Sympatex membrane
- Additional reinforced rubble edge
- Extremely high shaft, 27 cm at EU shoe size 43

The lightest of the class 2 chainsaw protection boot, under 1 kg at size 41. The double BOA® Fit System impresses with its precise, safe fit, and quick on and off and/or loosening for ventilation and pressure relief. The closures withstand concrete, rain, ice and freezing temperatures. The PFANNER® patented chainsaw protection and the extended, wave-shaped rubble protection, make the boot immediately recognisable as a chainsaw protection boot. All-terrain puncture-proof Vibram sole with Kevlar, protective composite toe cap, TPU toe protection. The boot is suitable for all tasks such as carpenter, welder, steel-worker, etc. – the laces cannot burn.

Material:

Upper: leather, Cordura
Lining: Sympatex
Sole: Vibram

Sizes:

39–46, LS: 47–48

Item 102337

Arborist STX Vertical

- Rubble protection
- VerticalLoop for climbing ascenders
- Lightweight shoe (645 g / boot in size 43)
- Absorbent Vibram Light sole
- Sympatex membrane
- 2.6 mm Perwanger leather
- Tongue integrated into the upper: for optimum support without pressure points or slipping when walking

Arborist STX Vertical – maximum performance with minimum weight. When it comes to vertical climbing, every gram counts – and at just 645g per shoe (size 43), the Arborist STX Vertical is the ideal choice for anyone who wants to be light and efficient on the move. The Vibram Light sole ensures secure footing on any surface, while the Nano-Active sole provides a dynamic, springy feel. The integrated, interchangeable VerticalLoop replaces the classic foot loop – the ascender can be attached directly to the shoe. Water-repellent 2.6 mm thick Perwanger leather in combination with the Sympatex membrane offers reliable protection against wind and weather. For a stable fit without friction: the tongue is seamlessly integrated into the shaft and prevents pressure points and slipping when walking.

Material:

Upper: Perwanger leather
Lining: Sympatex
Sole: Vibram

Sirius 2.5 Mountaineering Boot

- Improved tongue construction for greater comfort / less pressure points
- PU cushioning element in the heel area
- 2-zone lacing with stable and smooth-running shoe hooks at the instep
- Rubber rubble protection with a carbon-look finish
- Neoprene insert at the top rear of the shaft to prevent the entry of dirt and stones
- Sympatex membrane
- Rustproof copper-chrome eyelets
- Suitable for crampons

Material:

Upper: nubuck leather
Lining: PES
Sole: Vibram

Sizes:

39–46, LS: 47–48
Large sizes: + 10 % surcharge

Sirius 2.5 – The high-performance mountain boot for demanding tours. Whether tackling rocky ascents or high alpine terrain – the Sirius 2.5 is the perfect companion. Its top-quality features combine functionality, comfort and durability at the highest level. The grippy Vibram sole ensures optimum traction on any surface, while the flexible nubuck leather comfortably adapts to the foot. The robust 2-zone lacing with rustproof copper-chrome eyelets and smooth-running hooks at the instep guarantees a secure fit.

Thanks to the improved tongue construction and PU cushioning in the heel area, you'll enjoy an exceptionally comfortable walking experience. The breathable, waterproof Sympatex membrane keeps your feet dry even in changing conditions. An all-round rubber rubble protection in a modern carbon-look finish, along with a neoprene insert at the top rear of the shaft, provides reliable protection against dirt, moisture and small stones. Visually, the Sirius 2.5 impresses with its sporty, striking lines – functional and stylish at the same time.

Outdoor Light Functional Socks

- High breathability
- Highest wear comfort through Modal wool
- Shock-absorbing effect
- Lower mesh density at the top

The wear comfort has improved once again due to switching to Modal wool. The low mesh density at the back of the foot ensures optimum evaporation for the foot. The pressure-free seams prevent chafing of the toes even on long excursions. The Lycra fibre give the socks an optimal fit.

Material:
52 % viscose / modal, 24 % polyester, 21 % polyamide, 3 % Lycra

Sizes:
S: 38–40, M: 41–43, L: 44–46, XL 47–49

Item 101210

Outdoor EcoDry Functional Socks

- Two layer knit structure
- Inner layer of merino wool
- Outer layer made of polyamide
- Shock-absorbing effect, protection against chafing on heel and sole of foot
- 1×1 knitted shaft
- Ideal for shoes with a high shaft

Outdoor EcoDry Functional Socks: designed to keep your feet warm and dry in changing weather. These socks combine natural warmth with enhanced breathability and drying properties.

Material:
62 % merino wool, 20 % polyamide, 15 % polyester, 3 % lycra

Sizes:
S: 38–40, M: 41–43, L: 44–46, XL 47–49

Item 101230

Stretch Belt with Holzer Logo

- Robust material
- Elegant Holzer logo embossed on the buckle
- Optimum hold and maximum wearing comfort – even under constant movement
- Convenient quick-release and stepless adjustable buckle
- Ideal for forestry workers, craftsmen and outdoor or leisure activities

Strong. Flexible. Reliable. The stretch belt from PFANNER® for work, leisure and adventure. This extra-robust, elastic belt with a durable metal buckle is designed for people who work hard every day. Thanks to the stretchy material, the belt easily adjusts to any situation without losing stability. A belt that delivers what it promises.

Material:
100 % polyester,
100 % nickel-free metal buckle

Sizes:
120 / 140 cm long, 38 mm wide

Magnetic holder for a secure fit

Easy folding of the finger cover incl. thumb

NEW

Vario Fold-Back Thermo

- Completely windproof
- Reinforced leather palm
- Integrated loops for removal
- High-quality workmanship
- To wear with free fingers or as a mitten

Completely windproof and versatile: the Vario Fold-Back Thermo is a practical combination of finger glove and mitten! The windproof finger warmer is made from a lightly lined softshell fabric. The leather palm makes the glove very robust. The material composition of breathable and weather-resistant materials makes the glove suitable for use in cold temperatures for maximum dexterity. The big advantage lies in the ability to expose the fingertips – or to protect the fingers with the cover when it is cold.

Material:
polyester, goatskin

PROTOS® Safety Glasses SB1–4 E

The PROTOS® Safety Glasses provide optimum protection against UV rays, as well as small particles such as sawdust, sand, coarse and fine dust particles. Ideal for assembly work, as well as for arborists and brush cutters. This protection is provided in front and at the sides. By connecting the attachment arms to the PROTOS® interior fittings, no sound bridge can occur at the support pads of the hearing protectors.

The assembled safety glasses can be swivelled in and out of the stand-by position without having to change the tilt or length adjustment. A small locking lug keeps the glasses securely in the upper park position. All PROTOS® safety spectacles are ideal for and, thanks to the extended test for extreme temperatures, are also ideal for indoor and outdoor use (-5 °C to +55 °C). The optimised E models offer a significantly extended protective area coverage, especially to the sides and downwards.

Item 204090

PROTOS® Set Lupine Piko R 4SC

- Extremely compact, lightweight, reliable and bright: 2100 lumen
- Lamp head and battery together weigh just under 200 grams
- IP67 rated: not only dustproof but also waterproof
- Operational down to -25 °C
- Extremely shock-resistant aluminium housing
- High light-output with a range of 215 m (according to ANSI standard)
- Includes small LED "map reading light"

In terms of size, weight, reliability and brightness of 2100 lumen, the new Lupine sets the benchmark. The lamp head and battery together weigh just under 200 grams. With an IP67 rating, it is not only dustproof but also waterproof for temporary submersion. The batteries are cold-resistant and the lighting system remains operational at temperatures down to -25 °C. The milled aluminium housing is extremely shock-resistant. High range of 215m (according to ANSI standard) with outstanding illumination across the working area. The lamp also features a small LED "map reading light" for close-range tasks. A versatile remote control allows the lamp to be operated from the wrist or even from the saw – no need for buttons on the helmet. With optional accessories, the Lupine can be quickly converted back into a headlamp.
